IV	Assembly Parts List	1-311

SECTION I

INTRODUCTION AND REFERENCES

1. This Technical Order is the Parts Catalog for the Models P-40B and P-40C Pursuit Airplanes. It is distributed to Air Corps activities for the information and guidance in connection with the identification of parts for these models of airplanes.

2. Illustrations of parts affected by service and overhaul are contained in T. O. No. 01-25CF-2, Handbook of Service Instructions, and T. O. No. 01-25CF-3, Handbook of Overhaul Instructions for the Models P-40B and P-40C Airplanes.

3. Numerical List - a. Part Number ---- Various combinations of digits are grouped to make up part numbers, some containing five (5) digits without any break or dash appearing thereon, while others of the seven (7) digit class are noted on the parts list without dashes. The actual drawings note these parts numbers with two dashes. To compile this data on automatic printing machines, it is impossible to print these dashes or to leave a space between them; therefore, they are all grouped together. The first two (2) digits of a seven (7) digit number designate "Model", the second two (2) digits designate "Unit or Installation" and the last three (3) digits designate the part number - followed by a vertical dashed line which separates the dash numbers from the part number proper. These dash numbers are actually separated by spaces to define them.

b. Alphabetical List Page Number ---- Number appearing under this heading indicates on what Alphabetical List page, part appears.

4. Alphabetical List - a. Part Number ---- Various combinations of digits are grouped to make up part numbers, some containing five (5) digits without any break or dash appearing thereon, while others of the seven (7) digit class are noted on the parts list without dashes. The actual drawings note these parts numbers with two dashes. To compile this data on automatic printing machines, it is impossible to print these dashes or to leave a space between them; therefore, they are all grouped together. The first two (2) digits of a seven (7) digit number designate "Model", the second two (2) digits designate "Unit or Installation" and the last three (3) digits designate the part number, followed by a vertical dashed line which separates the dash numbers from the part number proper. These dash numbers are actually separated by spaces to define them.

b. Description ---- The heading title word or noun is always spelled out in full, but the remainder may be abbreviated.

c. L. or R. ---- This column indicates that the part is fabricated for either left or right hand installation.

d. Total Quantity ---- The quantity noted in this column indicates the total number of details, assemblies or installations required per airplane. It conveys the total requirements in estimating the quantity needed for maintenance of airplanes in service. When desirous of determining the quantity necessary for one unit, divide the listed quantity of the detail, assembly or installation by the listed quantity of its preceeding assembly or installation.

e. Assembly List Page Number ---- Number appearing under this heading indicates on what Parts List page, part appears.

5. Parts List - a. Assembly Indentation ---- Column numbers 1 to 10 inclusive are marked with an "X" to indicate graphically the relation of all detail parts to their sub or major assemblies.

b. Indent Code ---- The number on this column corresponds to the column number having an "X" noted thereon and is used only for noting "X's" in Assembly Indentation columns.

c. Drawing Size ---- Letter noted in this column indicates the size of the drawing.

d. Part Number ---- Various combinations of digits are grouped to make up part numbers, some containing five (5) digits without any break or dash appearing thereon, while others of the seven (7) digit class are noted on the parts list without dashes. The actual drawings note these parts numbers with two dashes. To compile this data on automatic machines, it is impossible to print these dashes or to leave a space between them; therefore, they are all grouped together. The first two (2) digits of a seven (7) digit number designate "Model", the second two (2) digits designate "Unit or Installation" and the last three (3) digits designate the part number, followed by a vertical dashed line which separates the dash numbers from the part number proper. These dash numbers are actually separated by spaces to define them.

e. Part Name ---- The heading title word or noun is always spelled out in full, but the remainder may be abbreviated.

f. On Assembly ---- "L" or "R" in this column indicates that the part noted is used on the left hand or right hand only. Where no "L" or "R" is noted, the part is interchangeable between the right hand and left hand assembly, where "hand" is involved.

g. "L" or "R" ---- "L" or "R" in this column indicates that this part is fabricated as either a left or right hand part or assembly.

h. Customer Furnished ---- The numerical one (1) in this column indicates that the part is furnished by the customer and installed by the contractor.

i. Detail of C.F. ---- The numerical one (1) in this column indicates that the part is a detail of a customer furnished assembly to be installed by the contractor.

j. Number Required Per Plane ---- The quantity noted in this column indicates the total number of details, assemblies or installations required per airplane. It conveys the total requirements in estimating the quantity needed for maintenance of airplanes in service. When desirous of determining the quantity necessary for one unit, divide the listed quantity of the detail, assembly or installation by the listed quantity of its preceeding assembly or installation. When the preceeding assembly or installation is left hand or right hand, this unit quantity will be noted in the columns marked, "Unit Req'd. L.H." or "Unit Req'd. R.H.".

k. Unit Required L.H. ---- The quantity noted in this column indicates the number of details or assemblies required for each of their preceeding left hand assemblies or installations.

l. Unit Required R.H. ---- The quantity noted in this column indicates the number of details or assemblies required for each one of their preceeding right hand assemblies or installations.
