Day of Deliverance

An interpretation of "La Marseillaise," the French national anthem, the authorship of which is attributed to Claude Joseph Rouget de l'Isle. Bernard Lamotte, celebrated French painter, has depicted in his painting a present-day city in France which has just been evacuated by the Germans after their customary destruction. The people march into the public square led by the modern Jeanne d'Arc who raises anew the tricolor. . . . Portfolios of reproductions of paintings in the Capehart Collection may be secured at nominal cost from your Capehart dealer, or direct from the Capehart Division at Fort Wayne 1, Indiana.

FARNSWORTH TELEVISION & RADIO CORPORATION

A NEW DAY! . . . Out of the dark hovels of poverty and despair come the people, long oppressed. Timidly they step into the arena of light—hoping yet fearing lest they be smitten anew. . . . But the tyrant weakens and reels! And for them—the people of France—day of deliverance!

Day of joy—when Liberté, Egalité and Fraternité are reborn with a rapturous meaning. When men may sing—unchained, ungagged—the song of a free people—"Allons, enfants de la Patrie."

Yes, come, you children of France—and come you children of all beggared nations of the earth—arise! And—as the chains of slavery fall—sing!

For song is the ever-ready accompaniment of freedom. In music of all kinds men find the true reflection of their hopes, their dreams and their loftiest aspirations. Find in it, too, the inspiration to greater courage and mightier action!

Men who love music—be it the stirring strains of a national anthem or the sweep of a symphony—have come to look to the Capehart for music supremely interpreted. Today the Farnsworth Television & Radio Corporation is developing and producing highly scientific electronic instruments for war; but new Capeharts will be available after victory is won.

However, your Capehart dealer is still ready to serve you in other ways. And you are invited to our showrooms where you may hear "La Marseillaise" as recorded by Marcel Journet (Victor No. 655) or as conducted by A. V. Alexandroff (Columbia No. 36266). And you may hear the heroic works of France's great national composers—Berlioz, Franck, Debussy, Bizet, Ravel.

ANOTHER YEAR CLOSER TO TELEVISION

As we go into our third and most optimistic year of war, planning for peacetime receives more and more public attention.

Forward-looking retailers want to know what manufacturers will offer. Manufacturers are still using all their engineering talent for the war program, and their post-war activities must remain in the planning stage.

Farnsworth will produce radios and phonograph-radio combinations soon after war contracts are cancelled. These will be improved sets, more salable;

there will be more emphasis on Frequency Modulation.

Then will come Farnsworth Television — one of the greatest of post-war merchandising opportunities, with a market prepared and educated by our advertising. Television will be closely associated with radio in both sales and service.

Farnsworth is equipped to play a larger part in the post-war market. Our facilities have been considerably enlarged . . . all our resources today are devoted to the manufacture of

precision military communications equipment and other electronic devices that require the same experience as our peacetime production. We have developed many new techniques and methods.

I can promise you that — as fast as Farnsworth plans are formulated — we will pass them on to you to help your planning. For the organization that is ready for post-war business is the one that will benefit from it.

Ed. Michaelis

WHAT golden ligature ties nations
into one? Not politics, or systems,
or ships with treasure in the hold. People
are one in aspiration, and in their
love for music. The savage Khan, no less
than lovely child, is stirred by

THE FARNSWORTH

Price may often be a consideration in the purchase of a radio or a phonograph-radio, but modest price still can be combined with quality, as in the Farnsworth. There are table models, chair-side types, portables, and phonograph-radio combinations, some equipped with FM. They offer a quality of performance you might expect of higher priced instruments. (Farnsworth television receivers, available soon in some cities, particularly where programs are being televised, present the same blending of quality and economy.) Convenient purchase terms. Radio and phonograph-radio prices: \$25 to \$350

The nomad Polovtsian tribesmen leap and spin in festival dances for the captured warrior Prince Igor. An interpretation for the Capehart Collection of Borodin's Polovtsian Dances from "Prince Igor" by Robert Riggs

Portfolios of reproductions in the Capehart Collection may be secured at nominal cost from your nearest Capehart dealer, or from Capehart Division, Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana

dance, and bow, and horn. The chant
of trumpet calls alike to slave and
free. Music speaks in all tongues—it
is the universal handclasp, the constant,
open look. Let the inspiration
of great music speak to you, now,
through the medium of
the Capehart and the Farnsworth.

THE CAPEHART

As the full beauty of opera is distinctly in the concert hall, so through the medium of the new Capehart, it is brought into all the clarity of the original performance. A revolutionary new tone system brings music into the home as it has never been brought before. Distinctive cabinets, of period design, are created by furniture craftsmen. The brilliant radio is equipped for FM reception. (Capehart television, when presented, will be of traditional Capehart excellence.) Prices: The Panamuse by Capehart, \$300 to \$700. The Capehart, \$925 to \$1500

FARNSWORTH TELEVISION

In those cities where television programs are broadcast, a limited number of Farnsworth table model television sets will soon be available. Like the Farnsworth portable radio, table model, and phonograph-radio, the new television receiver combines modest price with the quality you expect from the home of television. Prices: Farnsworth radios and phonograph-radios, **\$25 to \$350**

A color-action photograph from "Song of Norway," Broadway musical hit now in its second year, based on the life and music of Edvard Grieg.

Capehart and Farnsworth television will bring the greatest stage shows to your home—in sparkling, detailed black-and-white action pictures.

cities. On the Capehart and the
Farnsworth television will reproduce
in clear, sparkling black
and white the musical comedy,
the opera, the play, the ballet, the news
of the hour, as it happens.

CAPEHART TELEVISION

Only by comparison with the human voice, or with the original musical instrument, can the clarity and purity of tone of the new Capehart be appreciated. That standard of excellence will be inherent, also, in the new Capehart television receivers. Just as Capehart brings you the finest in musical reproduction, so will Capehart bring you the finest in visual entertainment. Prices: The Capehart-Panamuse Phonograph-Radio, **\$300 to \$700**. The Capehart **\$925 to \$1500**

Village Festival

An interpretation of Liszt's "Hungarian Rhapsody No. 1," painted by K. Riggs for the Capehart Collection. Merrymaking villagers are celebrating harvest with a whirling "Csardas," national dance of the Magyars. Gaily to watch are two children whose legs are crimsoned from pressing grapes; a genial patriarch in shepherd's robes, and an old woman tipping wine. Riggs, a noted American artist, is represented in many of the leading museums.

Fast-falling shadow . . . and fast-twirling figures of the village dance. Festive laughter fills the twilight, and, through it all, the singing rhapsody of the music!

How fortunate are those to whom the blessing of good music is a familiar experience. That good fortune is a double felicity when the Capehart or the Farnsworth is music's medium . . . for theirs is a supreme interpretation which captures the full riches of the world's great compositions.

War's needs now demand vital Radar and electronic instruments produced by the Farnsworth Television & Radio Corporation. With the return of peace, however, a new Capehart or new Farnsworth will be a reality to welcome into your own home.

Many of these matchless radios and phonograph-radios will bring for your pleasure the glorious reception to be found with FM. And one day, with television, others will open windows to a new world.

Your choice can range tomorrow across a vast array of cabinet styles and sizes . . . from luxurious instruments of handsome design to dependable phonograph-radios of modest price. And you may be confident that in each field your Capehart or Farnsworth will express a quality finest at its own. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

Portfolios of reproductions of paintings in the Capehart Collection may be secured at nominal cost from your Capehart dealer, or you may write direct to Capehart Division, Fort Wayne 1, Indiana.

The wedding march from Mendelssohn's "A Midsummer Night's Dream," painted for the Capehart Collection by Andre Girard. This delightful scene depicts Duke Theseus and his bride Hippolyta wending through the woods from Athens, followed by the four lovers . . . Hermia, Lysander, Demetrius and Helena, and a procession of Shakespeare's figures, as Queen Titania and her elfin company look on. Portfolios of reproductions of paintings in the Capehart Collection may be secured at nominal cost from your Capehart dealer, or you may write direct to Fort Wayne 1, Ind.

He, and she,
and
Summer's dream

Love is a never-never land, where days are but dreams and nights are deep in summer's magic. Yet even lovers must sometime face the winter of the outside world. Youth's vision seems lost . . . the green years, fled.

Music, then, can help the heart find its way back to that first enchanted realm. Through the glory of the Capehart or the Farnsworth, romance's songs are newly radiant. Old favorites, from opera to rhapsody, hold fresh promise for the present hour.

Now, many thousands can again look forward to exquisite Capeharts and new, modest-priced Farnsworths. From the hands of men who today make Radar and precision military equipment, these phonograph-radios and radios foreshadow new vistas in the pleasure of music.

Finer record reproduction will be yours, for one, and richer tone, as well. FM reception will be available in many. Reliable record-changers, too, with the assurance of time-proved dependability. And television sets when tomorrow's programs arrive in bright reality.

Make a place in your plans for a Capehart or a Farnsworth . . . confident that there will be a wealth of cabinet styles and sizes to afford a perfect choice. Confident, too, that whichever you select, it will be a product of beauty and of skill, the highest possible quality-at its price. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

Farnsworth Record Changers Guarantee Satisfied Customers

THERE is no question that the biggest dollar volume and profit item in the radio store of tomorrow will be the phonograph-radio combination. Surveys show that an overwhelming majority of prospective purchasers want to make their first purchase a phonograph-radio combination.

All the more reason, then, to tie up with Farnsworth! For the new, improved record changers in the post-war line of Farnsworth combinations will add to a reputation already established for dependability. Your customers will appreciate their simple construction, their care-free operation, their careful handling of records. *And remember, a successful record changer in the home is the opening wedge for repeat sales in your record department!*

Back of these new Farnsworth changers are 17 years of experience in designing, engineering and building service-free changers, including the incomparable Capehart. This experience means that the Farnsworth dealer retains his customer good-will and full profit on every sale.

The new Farnsworth radios, phonograph-radios and television sets will be housed in "idea" cabinets of distinctive styling — styling that sells! The tremendously effective Farnsworth national advertising campaign will continue to back up the individual dealer's own sales promotional efforts. But most important, the Farnsworth selected dealer policy affords a profitable volume at established prices and proper margins!

So there may be a flowering

Clap of thunder, rising wind, and then . . . the rains come. On roof and window-pane, they tap a friendly rhythm. For they speak of freshened earth, golden harvests, a garden at the rainbow's end.

This is the message, too, of music. For the Capehart or the Farnsworth brings the song of rain to restore the weary. Concertos and symphonies that nourish tender dreams!

To make the riches of music yours, at a touch, the Farnsworth Television & Radio Corporation is calling on skills of

long years' standing, as well as war-learned techniques. Bringing you phonograph-radios, radios and television receivers so clear—so brilliant—it seems the artist plays at your express command.

You'll have even better record reproduction . . . and, for added ease, record-changers which provide hours of effortless enjoyment. FM reception, available in many models . . . all-wave standard radio sparkling as you've always hoped.

Look for greater freedom of choice than ever possible before! Beautiful cabinet

styles, of many sizes, from the magnificent Capeharts to the more modestly priced Farnsworths. Whatever its cost, it will again be the very finest for the price! Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

Debussy's "JARDINS SOUS LA PLUIE," interpreted for the Capehart Collection by Bernard Lamotte. Between Paris and Versailles lies the charming region so beloved by Debussy—and by the artist, who envisions this country garden, refreshed by gentle summer rains. SCORES OF QUESTIONS like the above will be answered for you when you read "The Story of Electronic Television." Here, in a colorfully illustrated, easy-to-read booklet is the complete, concise explanation of the miracle of modern television.

Heretofore, this fascinating booklet was available only to those directly connected with the television industry. Now it can be offered to all interested persons. It sets forth in plain, non-technical language the entire story of television, how it began back in the minds of the ancients, how present-day science has made it a reality. In this booklet you will find how electronic television

works, how it has been developed since the early days when Philo T. Farnsworth first set forth the basic idea as a fifteen-year-old high school student. And in this booklet you will find a key to the potentialities of television as it will affect our daily living, how it will contribute to the fields of entertainment, industry and education.

"The Story of Electronic Television" has been called the most complete, understandable explanation of this important new endeavor yet written. For your free copy, write the Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

EXTENDS COMMUNICATION ACTIVITIES

BY ACQUIRING

THE HALSTEAD TRAFFIC COMMUNICATIONS CORPORATION

WILLIAM S. HALSTEAD, president of the Halstead Company, joins the Farnsworth organization as consultant on radio communications equipment and traffic control, as well as on other phases of Farnsworth's broad electronic developments.

JOHN A. CURTIS, vice president of the Halstead Company and chairman of its management committee, joins the Farnsworth organization as manager of the mobile communications sales division.

TO EXTEND its broad communications activities into the rapidly expanding field of mobile railway and highway communications and control, Farnsworth has acquired the assets of the Halstead Traffic Communications Corporation, including its developments, designs and patents. Key personnel, including William S. Halstead, president, and John A. Curtis, vice president, have joined the Farnsworth staff.

The Halstead organization is a recognized pioneer in this relatively new field of radio communications. It has invented, developed and produced field-tested equipment to provide railroads with modern, unfailing radio communications. It gave the world its first successful highway radio service, including the centralized control of busses, trucks and passenger vehicles.

The Halstead technical staff will establish new headquarters at the Fort Wayne Farnsworth laboratories. The organization will be merged and coordinated with more than two hundred Farnsworth research and development engineering personnel—a staff of scientists and technicians recognized as one of the country's leading technical organizations in the development of television; broadcast transmitters and receivers; radio-phonographs, and the most complicated types of radio and radar equipment for the Armed Forces.

Farnsworth resources, plus its seventeen years of electronic pioneering, its extensive engineering staff, and specialized manufacturing facilities, will strongly augment the outstanding position of the Halstead developments in this field.

The war has sharply demonstrated that the service of railroads is indispensable and that private ownership, management and operation are able and efficient. Now that the war is over, railroad plants should be modernized to take advantage of new things learned during the war years and to permit operation under new and higher standards. Railroad radio is one of these new developments, and, as a means of communication, has already been installed experimentally at several points in yard operation and its experimental use on certain sections on our main line is planned."

G. Metzman

President, New York Central System

Mr. Metzman's statement symbolizes the forward-looking thinking of top railway management today. The railroads are going forward, with improvements and modernization designed to increase the efficiency and safety of all types of operations.

The Farnsworth Television & Radio Corporation, through its recent acquisition of the Halstead Traffic Communications Corporation, is playing an increasingly important part in furthering these aims. Halstead Systems provide a factor of safety unique to the field of mobile communications. A radio counterpart of the closed-circuit principle, perfected during the war, is contained in the exclusive "auto-pulse" unit, standard

on all Halstead equipment, whether AM or FM, space or induction type systems.

The combined talent of Farnsworth and Halstead research and engineering, together with Farnsworth's productive skills and facilities will keep in step with the railroads' growing interest in mobile communications.

For specific information, write Farnsworth Television & Radio Corporation, Dept. RA-11, Fort Wayne 1, Ind.

Hear what they're saying about **the new FARNSWORTH LINE!**

No wonder they're enthusiastic! Farnsworth's new line of radios, phonograph-radios and phonographs is a positive sensation!

Every one's a stand-out! From the smart "idea" cabinets in the smaller models, to the truly modern and the graceful period designs of the floor models!

Those distributors and dealers who've already seen the Farnsworth "streamlined" line, are loud

in their praise. And delighted, too, with the Farnsworth Selected Dealer Program.

We're sending the Farnsworth show to every distributor point in the country. Farnsworth Franchised dealers who have yet to see it have "really something" to look forward to—and when they do, will, more than ever, be glad they signed with Farnsworth.

FARNSWORTH

EXTENDS COMMUNICATION ACTIVITIES

BY ACQUIRING

THE HALSTEAD

TRAFFIC COMMUNICATIONS CORPORATION

WILLIAM S. HALSTEAD, president of the Halstead Company, joins the Farnsworth organization as consultant on radio communications equipment and traffic control, as well as on other phases of Farnsworth's broad electronic developments.

JOHN A. CURTIS, vice president of the Halstead Company and chairman of its management committee, joins the Farnsworth organization as manager of the mobile communications division.

To EXTEND its broad communications activities into the rapidly expanding field of mobile railway and highway communications and control, Farnsworth has acquired the assets of the Halstead Traffic Communications Corporation, including its developments, designs and patents. Key personnel, including William S. Halstead, president, and John A. Curtis, vice president, have joined the Farnsworth staff.

The Halstead organization is a recognized pioneer in this relatively new field of radio communications. It has invented, developed and produced field-tested equipment to provide railroads with modern, unfailing radio communications. It gave the world its first successful highway radio service, including the centralized control of busses, trucks and passenger vehicles.

The Halstead technical staff will establish new headquarters at the Fort Wayne Farnsworth laboratories. The organization will be merged and coordinated with more than two hundred Farnsworth research and development engineering personnel—a staff of scientists and technicians recognized as one of the country's leading technical organizations in the development of television; broadcast transmitters and receivers; radio-phonographs, and the most complicated types of radio and radar equipment for the Armed Forces.

Farnsworth resources, plus its seventeen years of electronic pioneering, its extensive engineering staff, and specialized manufacturing facilities, will strongly augment the outstanding position of the Halstead developments in this field.

YOU'LL ATTEND THE SHOW AT HOME-BY TELEVISION!

Action photographs of Freddie Trunkler and Virginia Lutz, stars of "Hats Off to Ice," at Rockefeller Center Theater, New York.

You'll turn a favorite easy chair toward your Capehart or Farnsworth television receiver—you'll flick the switch—and watch as well as hear your choice of the evening's shows, sports or entertainments—while they are taking place miles away!

The wonder of universal home television is not far off. And the latest marvels of radio and music reproduction are here . . . in Farnsworth factories, where new phonograph-radios and radios are being manufactured for you.

These are the finest Capehart and Farnsworth instruments we have ever been privileged to build. In tonal beauty, in faithful reception and reproduction, you will recognize the fruits of 19 years of electronic research at Farnsworth.

Each model will provide brilliant performance—many with FM radio. Cabinets are rich with flawless woods or the colors of exciting new materials. Even the justly famous Capehart and Farnsworth record-changers have been further perfected

—to assure you quiet, dependable performance, and careful handling of your records. Superb Capehart or more modestly priced Farnsworth—each is built to bring you the finest quality and greatest value for your pleasure and enjoyment. Farnsworth Television & Radio Corporation, Ft. Wayne 1, Ind.

Journey to a Star

THIS is the hour—out of all time—when the heart has reason to make known its joy. With a welcome for the traveler, home from many a hard journey—with a candle in the window, a carol sung in the night.

But there is perhaps no more eloquent way to express the season's gladness than through a gift of music. Year after year, your Capehart or Farnsworth will re-weave the star-touched spell of Christmas—like some enchanted package whose contents never wane.

Already today's new Farnsworth models, in sizes from table sets to important cabinets—from around

\$25 to \$300—are arriving in dealers' showrooms—delighting listeners with their stirring, richly colored quality of tone—convincing testimony to electronic research which stretches back long before war's coming.

Or, may we suggest that you plan now towards early ownership of a magnificent Capehart endowed with a revolutionary new tonal system—improved in every respect even to the record-changer which has won so much acclaim for its smooth, unique action? The new Capeharts and the Panamuse by Capehart will be priced from approximately \$300 to \$1500.

Whatever your selection—Capehart or Farnsworth—you will choose an instrument of lasting pleasure, highest quality possible at the cost. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

"O LITTLE TOWN OF BETHLEHEM," one of the most beloved of Christmas carols, is the theme of Bernard Lamotte's painting which depicts the familiar story of the Wise Men wending toward the glowing light of the risen star. Portfolios of reproductions of paintings in the Capehart Collection may be secured at nominal cost from Capehart dealer, or you may write direct to Fort Wayne 1, Indiana.

Hay

"T

he war has sharply demonstrated that the service of railroads is indispensable and that private ownership, management and operation are able and efficient. Now that the war is over, railroad plants should be modernized to take advantage of new things learned during the war years and to permit operation under new and higher standards. Railroad radio is one of these new developments, and, as a means of communication, has already been installed experimentally at several points in yard operation and its experimental use on certain sections on our main line is planned."

Metzger

President, New York Central System

Mr. Metzger's statement symbolizes the forward-looking thinking of top railway management today. The railroads are going forward, with improvements and modernization designed to increase the efficiency and safety of all types of operations.

The Farnsworth Television & Radio Corporation, through its recent acquisition of the Halstead Traffic Communications Corporation, is playing an increasingly important part in furthering these aims. Halstead Systems provide a factor of safety unique to the field of mobile communications. A radio counterpart of the closed-circuit principle, perfected during the war, is contained in the exclusive "auto-pulse" unit, standard on all Halstead equip-

ment, whether AM or FM, space or induction type systems.

The combined talent of Farnsworth and Halstead research and engineering, together with Farnsworth's productive skills and facilities will keep in step with the railroads' growing interest in mobile communications.

Meet Mr. Music!

That's not his real name, of course. It's a term of respect and affection bestowed on him by his customers for his friendly interest, his deep appreciation of their needs.

"Mr. Music" operates the leading music store. But it's more than a store. It's the nerve center for the entire musical life of the community. Its influence extends into the home, the school, the church... every place where music has meaning.

"Mr. Music" knows the value and the importance of music. Like as not, he's on the board of the symphony association. Possibly he has been responsible, more than any other citizen,

for the advancement of music in the community. And he's probably the "angel" for the harmonica band made up of kids from across the tracks.

"Mr. Music" knows the Capehart, too. He knows it as the supreme instrument for musical reproduction—the outstanding name in the music world today. That's why he's proud to display and sell the Capehart—he knows that every Capehart installation furthers the cause of good music. Capehart Division, Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

"Railroads... Like a Giant Conveyor Belt"

"The war has emphasized the importance of American railroads. Like a giant conveyor belt, they link up the industrial, agricultural and mining areas of this country with the many thousands of markets that dot our land. With reconversion a fact, far-sighted railroad management is carefully exploring many technological war developments, and, in particular, radio, with the expectation that radio will help keep American railroads the safe, efficient and modern network of transportation which has so ably served the Nation during the war."

S. P. Russiman
President, Detroit, Toledo & Ironton R. R. Co.

RADIO has a story to tell the railroads... a story that will contribute to their continued safety, efficiency and economy of operation. Through its Mobile Communications Division, the Farnsworth Television & Radio Corporation is now telling its railroad radio story to railroads in all parts of the country.

Farnsworth brings to railroad radio specially designed, thoroughly tested equipment, utilizing either space radiation or induction principles... equipment which gives positive, unfailing voice communication between the operating units of a railroad, whether moving or stationary.

Furthermore, Farnsworth brings sound engineering, backed up by adequate facilities and by eight years of research into the problems of railroad radio... the experience of the Halstead Traffic Communications Corporation, whose assets and key personnel were recently acquired by Farnsworth. For instance, the corrosive effects of coal gases on radio equipment is one of a number of problems which have been solved in the design of Farnsworth Mobile equipment.

Write for the complete story of Farnsworth railroad radio. Address the Farnsworth Television & Radio Corporation, Dept. 0-00, Fort Wayne 1, Indiana.

Just consider these outstanding features of the new Farnsworth changer, the heart of the phonograph-radio:

3-POINT SUSPENSION

Records are handled, not by one or two, but by 3 points of suspension, perfectly synchronized for balanced action. They're handled only at the edges—no marring of surface grooves.

CONTROLLED DROP

Records are quickly but gently lowered into position on a column of air—no chipping or marring.

FEATHERWEIGHT TONE ARM...

together with a climatic tested crystal pick-up and a precious-metal stylus make for safe, positive positioning, superb reproduction—without the annoyance of constantly changing needles.

HOLD BACK

The tone arm automatically returns to an off-side position, enabling the user to remove all records from the turntable without having to manipulate the tone arm.

AUTOMATIC STOP

When the last record is played, the mechanism shuts off. Plays any number of records up to twelve 10" or ten 12".

* * *

With Farnsworth quality, customer's service calls are eliminated. But customers' calls giving you the names of friends who are interested in a Farnsworth will grow and grow and grow!

**Every Farnsworth
IS A
SELLING DISPLAY!**

Whether in your showroom, or in a customer's home, the Farnsworth phonograph-radio combination is always working for you! Once delivered to the home, it'll prove its superiority, not only to the owner, but to all of his friends. For, the owner is always proud to demonstrate his Farnsworth!

And with good reason! Handsome cabinet styling, the latest in technical developments, superb tone quality... all these give him pride in ownership. And, too, he'll be particularly proud of the flawless performance of Farnsworth's new DeLuxe 3-point suspension record changer.

Model EK-265—Farnsworth phonograph-radio combination of gracefully modern design in walnut.

Just consider these outstanding features of the new Farnsworth changer, the heart of the phonograph-radio:

3-POINT SUSPENSION

Records are handled, not by one or two, but by 3 points of suspension, perfectly synchronized for balanced action. They're handled only at the edges—no marring of surface grooves.

CONTROLLED DROP

Records are quickly but gently lowered into position on a column of air—no chipping or marring.

**FEATHERWEIGHT
TONE ARM...**

together with a climatic tested crystal pick-up and a precious-metal stylus make for safe, positive positioning, superb reproduction—without the annoyance of constantly changing needles.

HOLD BACK

The tone arm automatically returns to an off-side position, enabling the user to remove all records from the turntable without having to manipulate the tone arm.

AUTOMATIC STOP

When the last record is played, the mechanism shuts off. Plays any number of records up to twelve 10" or ten 12".

* * *

With Farnsworth quality, customers' service calls are practically non-existent. *But* customers' calls giving you the names of friends who are interested in a Farnsworth will grow and grow and grow!

A MILESTONE IN RAILROAD RADIO!

"Modern railroad transportation systems cannot function to their maximum efficiencies without the use of modern communications networks. That is why the Santa Fe System maintains complete telephone and teletype, as well as telegraph systems along its entire thirteen-thousand-mile right-of-way. It is also the reason for Santa Fe's immediate and careful exploration of all new communications techniques, such as railroad radio, and accounts for the many 'firsts' contributed by the Santa Fe to the railroad communications art."

W. C. Sullivan

President

Atchison, Topeka and Santa Fe Railway

AM or FM? Which to use on railroad radio? This question has long troubled engineers in both the railroad and the radio fields.

To determine the comparative operating characteristics of AM and FM radio equipment, The Atchison, Topeka and Santa Fe Railway, in conjunction with the Farnsworth Television & Radio Corporation, recently conducted an exhaustive series of tests.

As a result, railway men the nation over have for the first time a thorough evaluation of both types of modulation for railroad service. Of equal importance is the fact that the information derived now enables

Farnsworth to design better railroad radio equipment. Efficiency will be increased; the way has been opened to reductions in purchase price and maintenance cost.

Such tests add one more milestone to the development of railroad communications. The engineers of Farnsworth's Mobile Communications Division have pioneered many other important achievements. Backed by Farnsworth's ample production facilities, these engineers are now prepared to offer practical radio assistance to all the railroads of America.

The Farnsworth Television & Radio Corporation, Dept. RA-2, Ft. Wayne 1, Indiana.

FARNSWORTH
Record Changer!

It has an almost human touch—so gently, carefully and dependably does the new Farnsworth automatic record changer handle records. Suspended, not at one or two, but at three separate points, records are safely held at the edges only. And, when released, each record is lowered quickly but gently into position on a column of air—no chipping or marring of surface grooves.

When the last record is played, the feather-weight tone arm automatically returns to an offside position and the mechanism shuts off.

Thus, the user can remove one or all records from the turntable without having to manipulate the tone arm. "Trouble-free" is more than a catchword when applied to this new Farnsworth record changer. A marvel of simplicity—even a child can operate it without fear of damage to instrument or records.

Add to this perfection of mechanical performance, a climatic-tested crystal pick-up, a precious-metal stylus and the superb quality of Farnsworth tonal reproduction—and you can see why Farnsworth design and engineering "know-how" reduces annoying, costly service problems and also pays off in greater customer good will.

There's a lot of sweat in a symphony

Genius is not the only ingredient in an enduring symphony. Long hours of hard work, of dogged determination, must go into a musical composition before the composer is satisfied that it is "right."

So it is with any enterprise that is built to endure. In addition to their merchandising abilities, the leading music dealers of today—those who have best withstood the effects of wartime shortages—have long been accustomed to spending countless extra hours in order to make their business of most service to music lovers.

It's no wonder then, that the leading music dealers are Capehart dealers. For, in the organization back of the Capehart and the Panamuse by Capehart, the dealer finds

the same sound, constructive policies that meet with his philosophy of doing business. Realizing the Capehart is the supreme instrument for musical reproduction, he knows that the Capehart franchise offers him an unrivalled opportunity to create a successful music business.

These leading music dealers are now attending the current showings of the new Capehart and the new Panamuse by Capehart in New York, Chicago, Atlanta, Dallas, Los Angeles, San Francisco, and Denver. And Capehart dealers are again confirming the fact that the Capehart franchise is their most valuable asset.

The Capehart Division, Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

**"TO ATTAIN
 STILL HIGHER STANDARDS OF SERVICE..."**

"An asset in which the Nickel Plate Road takes great pride is the high standard of service which it renders to the shipping public. With its record for outstanding performance during the war years back of it, the Nickel Plate is looking forward to the utilization of new technological developments, such as radio and teletype, in order to attain still higher standards of service and usefulness."

J.M. Danni
 President,

The New York, Chicago & St. Louis R.R. Co.

To fulfill completely its promise of increased rail efficiency, railroad radio equipment must be so designed that individual system units, such as transmitters, receivers, power supplies, and remote control units, will be readily accessible for inspection and quickly removable for service, replacement, or relocation.

Realizing the importance of these requirements, the Farnsworth Mobile Communications Division has engineered its railway communications equipment on the bases of *standardized design and unitized construction*.

Practical results from the application of these two engineering principles include the facts that—

(1) The basic components of Farnsworth systems, whether of space-radiating or inductive type, are *separate units*, which can be *quickly disassociated* from a system, either for maintenance or relocation.

(2) The same receiver, transmitter, or remote control unit is usable for wayside, mobile, or relay installations, thus providing *complete interchangeability* of basic equipment throughout any Farnsworth communications system.

(3) *Space-radio and inductive type Farnsworth units can be interchanged*, whether a part of mobile or stationary installations, and can be *readily utilized in combination* to meet varying railway operating conditions and requirements.

These are a few of the many engineering features incorporated in Farnsworth railway communications equipments to guarantee *maximum availability and flexibility with simplified, low-cost maintenance*. Farnsworth Television & Radio Corporation, Dept. E-4, Fort Wayne 1, Indiana.

ALL HEARTS, sometime in life, journey
to the end of night. Fears hem in on
every side, and the gates of morning are
closed. Yet, for every valley of despair,
there are resources of courage. One
of these is great music. In the dark hour,

the FARNSWORTH

Farnsworth AC-DC three-band compact receiver. Broadcast, tropical and all short wave ranges to and including 13 meters. Designed to withstand severe tropical conditions, it is typical of the outstanding value built into all Farnsworth phonographs and phonograph-radios.

Moon-blue horses move over the desert in the painting by William Palmer for the Capehart Collection interpreting Copland's music for the ballet Rodeo

music is a stone removed from the
highway, a hedge cut through, a
tree felled. It is a hand reached out, a
voice recognized, a door swung
open in welcome. Music, interpreted
by the new Capehart or the new
Farnsworth, can enrich and deepen all
the experiences of life.

the CAPEHART

This master instrument for musical reproduction has always been the choice of the discriminating. The magnificent new Capehart, endowed with a revolutionary new tonal system should be compared only with the original musical instruments or with the human voice.

either for maintenance or relocation.

(2) The same receiver, transmitter, or remote control unit is usable for wayside, mobile, or relay installations, thus providing *complete interchangeability* of basic equipment throughout any Farnsworth communications system.

(3) *Space-radio and inductive type Farnsworth units can be interchanged*, whether a part of mobile or stationary installations, and can be *readily utilized in combination* to meet varying railway operating conditions and requirements.

These are a few of the many engineering features incorporated in Farnsworth railway communications equipments to guarantee *maximum availability and flexibility with simplified, low-cost maintenance*. Farnsworth Television & Radio Corporation, Dept. WSJ-3, Fort Wayne 1, Indiana.

TRAIN RADIO TO AID IN OPERATION OF PERE MARQUETTE'S NEW, STREAMLINED TRAINS

"By virtue of their efficient and effective performance during the war, the nation's Railroads have won the respect and goodwill of the American people. It is essential that this public esteem be maintained. That is why progressive railroad managements are planning the use of many technical developments capable of making additional contributions to the safety and comfort of rail passenger service, and why the new, streamlined passenger trains which Pere Marquette soon will put into operation are to be equipped with train radio communication systems."

President
Pere Marquette Railway Company

In designing mobile communications facilities for the nation's progressive railroads, Farnsworth has met and solved a number of unique engineering problems.

For example, before train radio could be of maximum service in streamlined train operation, new antenna techniques had to be developed. On the one hand, minimum clearance, far below the seventeen-to-twenty-inch height of the normal VHF railroad antenna, was a prime requisite. On the other hand, because human life, as well as valuable property, is involved in passenger train movements, efficiency and reliability could not be sacrificed.

Faced with this dual objective, Farnsworth engineers set to work. Creative engineering, coupled with careful field testing, resulted in the new *Farnsworth VHF train radio antenna*. Though as efficient as the taller, quarter-wave, ground-plane antenna, heretofore accepted as standard, it is only *eleven inches in height*.

This new antenna is another instance of the careful engineering and thorough research through which Farnsworth railway communications systems guarantee *maximum usefulness and flexibility with simplified, low-cost maintenance*. Farnsworth Television & Radio Corporation, Dept. EI-5, Fort Wayne 1, Indiana.

Phonograph-radio in period style, one of many from the Farnsworth line.

YOU'LL ATTEND THE SHOW AT HOME—BY TELEVISION

Action photographs of Fred Astaire and Ginger Rogers, stars of "Ball of Fire," at Rockefeller Center Theater, New York.

You'll turn a favorite easy chair toward your own Capehart or Farnsworth television receiver—you'll flick the switch—and watch as well as hear your choice of the evening's shows, sports or entertainments—while they are taking place miles away.

New television receivers by Farnsworth and Capehart are not far off. Whether your choice is the direct view or the screen projector type, you will have in your living room the results of 19 years of electronic research at Farnsworth.

Meanwhile the latest marvels of radio and music reproduction are here . . . in Farnsworth factories where new phonograph-radios and radios are being manufactured for you.

Each new model provides brilliant performance—many with FM radio. Cabinets are of flawless woods or exciting new materials. Even the justly famous Capehart and Farnsworth

worth record-changers have been further perfected to assure you quiet, dependable performance. Superb new Capehart or more modestly priced Farnsworth—each is built to bring you the finest quality and the greatest value for your pleasure and enjoyment. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

THE CAPEHART

**A DOOR closes. A key turns. Now alone
in the room of life, the heart asks its
poignant questions. But man was not made
for loneliness. Friends, colors, a sense
of purpose are necessities for us
all. And music, more than all the arts,**

Cello, flute, piano or human voice, heard on concert stage or in private recital, is heard again as clear and resonant in this magnificent musical instrument, the Capehart phonograph-radio. A revolutionary new tonal system reproduces all tones and overtones as they have never been reproduced before. The brilliant radio is equipped for FM and AM reception. Distinctive cabinets of authentic period design. (Capehart television receivers, which engineers are now creating, will be of the same standard of excellence.) Prices: The Panamuse by Capehart, **\$300 to \$700**. The Capehart, **\$925 to \$1500**

The sacred Swan, the soul, moves toward the dark cavern of Tuonela, abode of the dead, in the painting by Bernard LaMotte for the Capehart Collection, interpreting Sibelius' "Swan of Tuonela"

Portfolios of reproductions in the Capehart Collection may be secured at nominal cost from your Capehart dealer, or, Capehart Division, Farnsworth Television & Radio Corp., Ft. Wayne 1, Indiana

**can return these to the heart. Music is a
hand at your hand, a voice with your
voice. Music is influence, meaning,
discovery, a way when ways are hidden.
The rise of strings, the twining lute,
the misty brooding cello speak beyond all
speaking. Let them speak to you, now,
through the Capehart or the Farnsworth.**

THE FARNSWORTH

A table model radio for the upstairs room; a portable for garden party or Saturday picnic; a phonograph-radio for your favorite radio program, or hours of enjoyment with familiar recordings—all these Farnsworth offers in instruments that dramatically combine quality with low price. Engineering reflects Farnsworth skills, and demonstrates, again, that excellence need not be expensive. A variety of cabinet designs—some models equipped with FM. (Farnsworth television receivers, which soon will be available in certain cities, will blend quality and economy in the same degree.) Terms. Prices: **\$25 to \$300**

CAPEHART ADVERTISING ART TAKES TOP AWARDS IN NEW YORK AND CHICAGO!

IN NEW YORK—

The New York Art Directors Club Awards
Gold Medal to Robert Riggs' Interpretation of
Wagner's "Die Gotterdammerung."

IN CHICAGO—

The Art Directors Club of Chicago Bestows
Medal Award to Julio de Diego's Interpretation
of de Falla's "Three Corned Hat."

Another clean sweep! For the second successive year, Capehart advertising art has been honored with selection for top honors by two organizations of experts: men whose business it is to prepare successful advertising!

In Chicago, merit awards were also given to Bernard La Motte's painting illustrative of Offenbach's "Gaite Parisienne," and to William Palmer's interpretation of the Ballet Music in Copland's "Rodeo."

Thus, as the Capehart Collection grows in numbers, it grows in stature, too. With these new laurels Capehart is again affirmed as the advertiser most successful in interpreting the beauty of fine music through the printed page.

Here, then, is further recognition of Capehart's ability to create a desire for ownership. As Capehart instruments appear on dealers' floors, this desire will take definite shape... in the form of Capehart sales.

Tracy

It's not so strange...

◆ *that* **THE BUYING PUBLIC DEMANDS PROVEN QUALITY!**

Mere availability of merchandise is no assurance of sales! Dealers are finding that off-brand radios are getting tougher to sell and bouncing back more frequently. The public wants quality merchandise ... made by firms whose reputation they know and believe in!

◆ *that* **FARNSWORTH WILL NOT COMPROMISE WITH QUALITY!**

The public has come to expect superior quality for its money from Farnsworth—and it's going to get superior quality! Any temporary production volume advantage in producing sets of "just any available components" that do not come up to Farnsworth's rigid standards of quality would bring more harm than good in the long run.

◆ *that* **THE FARNSWORTH DEALER IS IN A STRONG POSITION!**

The Farnsworth reputation for quality is widespread ... every set sold creates more customers for the Farnsworth Dealer. A large part of the selling job has already been done.

We're shipping today as many sets as we possibly can. We're distributing them on a basis that's fair to every dealer. And we're looking forward to the day when we'll be able to ship each Farnsworth dealer all the sets he can sell!

The Farnsworth Selected Dealer Policy is proving to be one of the strongest ever created. It gives dealers "room to sell" and assures them of protected prices and proper margins. This policy means much to the dealer today ... and will mean even more in the competitive days ahead.

Santa Fe Trains To Get Radio, Music Systems

In announcing forthcoming installation of musical wire reproducers, radio and public address systems on their passenger trains, Fred G. Gurley, president of the Atchison, Topeka, and Santa Fe Railway, yesterday disclosed that individual outlets will be placed in sleeping cars.

Each roomette, bedroom, compartment, and drawing room will be equipped with push-button selector, a loud speaker, and volume control, so that occupants may have their choice of radio or wire-reproduced popular or semi-classical music, Mr. Gurley stated. A pilot lamp, lighting automatically when the announcement system is in use, will be installed so that passengers may turn the system on if they so desire.

As a forerunner of this innovation, wire reproducing units providing programs of various types of music, will be placed on the Santa Fe dining car 1450 when it goes into transcontinental service on March 10. As soon as equipment and labor are available, the railroad president declared, similar installations will be made on both new and old dining cars, as well as sleeping, chair, and club-lounge cars.

Speakers will be placed in the ceiling of these cars to provide an even distribution of low-level sound throughout the car. The volume will be set at an advantageous point for both the listener and conversationalist, it was stated.

Farnsworth Television and Radio Corporation of Fort Wayne, Indiana, designed the over-all integrated system.

Reprinted from the Chicago Journal of Commerce, March 4, 1946.

**New Program Distribution Systems Make Rail Travel
More Pleasant; Will Increase Passenger Traffic!**

Systems Produced by Pioneers in Quality Sound Reproduction, Communications and Television.

Music now brings its magic to the railway passenger — and gives railroads another tool with which to sell travel by rail!

In announcing the first modern electronic program distribution systems for railroads, the Farnsworth Television & Radio Corporation takes a logical step forward. Known for its superlative phonograph-radios, including The Capehart, for its pioneering in the fields of tonal reproduction, television and other forms of electronics, Farnsworth now extends its engineering knowledge and manufacturing skill to the field of passenger entertainment.

These new systems will meet the varying tastes of passengers and the specific operating conditions of individual roads. Based upon the knowledge secured from railroad-conducted surveys, the most complete Farnsworth system provides four channels for individual selection: one for classical and one for popular music; a third for radio programs; and a fourth for train announcements and travel talks. More simplified Farnsworth Systems are also available.

Farnsworth engineering has met and overcome the problems peculiar to pleasing sound reproduction in passenger cars, including the need for uniform, low-level distribution and automatic compensation for varying ambient noise levels.

With these comprehensive, flexible systems, railroads can now provide passengers with the same standard of entertainment and comfort they expect in their own homes. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

In announcing the first modern electronic program distribution systems for railroads, the Farnsworth Television & Radio Corporation takes a logical step forward. Known for its superlative phonograph-radios, including The Capehart, for its pioneering in the fields of tonal reproduction, television and other forms of electronics, Farnsworth now extends its engineering knowledge and manufacturing skill to the field of passenger entertainment.

These new systems will meet the varying tastes of passengers and the specific operating conditions of individual roads. Based upon the knowledge secured from railroad-conducted surveys, the most complete Farnsworth system provides four channels for individual selection: one for classical and one for popular music; a third for radio programs; and a fourth for train announcements and travel talks. More simplified Farnsworth Systems are also available.

Farnsworth engineering has met and overcome the problems peculiar to pleasing sound reproduction in passenger cars, including the need for uniform, low-level distribution and automatic compensation for varying ambient noise levels.

With these comprehensive, flexible systems, railroads can now provide passengers with the same standard of entertainment and comfort they expect in their own homes. . . . Farnsworth Television & Radio Corporation, Fort Wayne 1, Ind.

FARNSWORTH DEALERS *benefit*

BY FARNSWORTH *quality* STANDARDS!

FARNSWORTH phonograph-radio combinations... with the improved new Farnsworth automatic 3-point suspension record changer... are joining Farnsworth table models in increasing volume. The enthusiastic reception given these record-playing members of the Farnsworth line is even greater, if possible, than that given the table models.

Here is convincing proof that it pays to insist upon quality.

There isn't a bolt or a screw in the Farnsworth record changer which doesn't measure up to Farnsworth's rigid quality standards.

It would have been easy to use "alternative" materials... to

take manufacturing shortcuts... in order to put more phonograph-radios on the market sooner.

But there was too much at stake. Reputation, for one thing. Reputation for designing and building changers of superior quality. A reputation for treating the Farnsworth dealer fairly and equitably. A reputation for giving the public full value, dollar for dollar.

Because Farnsworth has kept its quality standards, the Farnsworth dealer benefits by more satisfied customers... more satisfactory profits.

The New Capehart is Here

An event of great importance is now taking place in the musical life of the nation.

The new Capehart, the finest instrument ever created by Capehart engineers, is being presented for the first time to the American public.

This distinguished new instrument is far more than a new model. Naturally, it continues the tradition of excellence which set apart the Capeharts of past

years. But the new Capehart is far in advance of those glorious instruments. It is an utterly new phonograph-radio.

Engineers spent a full year, after the cessation of their war activities, perfecting the new Capehart. Many ideas in it had not even reached the blueprint stage before the war.

The revolutionary new tonal system reproduces tones with a clarity never before captured by any phonograph-

radio. A new electronic pick-up, for the first time, gives to orchestra, choir or solo voice its true timbre. The time-improved record-changer, turning records more gently than human hands can do, is at a new point of perfection.

There may not be enough Capeharts to meet the immediate demand, for this superlative instrument is built too unhurriedly for mass-production. It is painstakingly made by artisans who

have for eighteen years produced "the world's finest instrument for musical reproduction."

These first models of the new Capehart await your inspection now, together with its worthy companion, the Panamuse by Capehart. You are cordially invited to see them in the show-rooms of authorized Capehart dealers — and to hear great music played as it has never been played before.

The new *Capehart*

As each Capehart dealer installs the new demonstration models in his showroom, he will affirm what his eyes and ears told him at the recent Capehart showings: the new Capehart is *really new!*

New—"Personal Appearance" tone. New—"True-Timbre" pick-up. New—military type circuit wiring. New—radio tuning system. New—FM circuit. New—built-in AM-FM antennae. New improvements in the time-proven Capehart record changer which turns the

records over—plays both sides continuously.

An achievement, like the new Capehart, cannot be performed by waving a magic wand. Even so, the creation of a new and improved Capehart within the first twelve months of peace, has been called miraculous by those who know the problem. No less wonderful is the building of the new Panamuse by Capehart, a companion line of phonograph-radios which embody the ex-

perience and skill of Capehart engineers and craftsmen, and which are housed in exquisite cabinets of traditional and modern design.

Every Capehart dealer will soon demonstrate to his discerning prospects that the *new* Capehart is more than ever "the supreme interpreter of the world's great music."

The Capehart Division, Farnsworth Television and Radio Corporation, Fort Wayne 1, Indiana.

Going Places...

**EXPERIENCE IS PROVING THE
 SOUNDNESS OF FARNSWORTH'S
 SELECTIVE DEALER POLICY**

WHEN you signed your name to a Farnsworth franchise, you gained more than identification with a famous line . . . you laid the foundation for a sound business future.

As a selected Farnsworth dealer you are benefitting in these ways:

LIMITED COMPETITION—You are one of a few. There are only one-fourth as many Farnsworth dealers in your market area as there are dealers representing other lines. Hence, four times the sales potential!

REPUTATION—You are in good company. Every Farn-

worth dealer is reputable . . . has been selected only on his qualifications to conform to the Farnsworth franchise requirements.

PROTECTED PROFITS—You enjoy a proper margin on a line brilliantly engineered and aggressively promoted. Furthermore, your Farnsworth profits are safeguarded through established fair trade practices.

Farnsworth is a high quality line. Yet, excellence need not be expensive. Farnsworth products are competitively priced and sold by dealers whose stores are recognized as quality outlets for radio, phonograph-radio and television sets. Farnsworth, as a quality line, will continue to have quality representation. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

Seeing is Believing..

Inside and out, Farnsworth quality is evident. When you see today's television on a Farnsworth—you see it at its best.

Television is no longer in rehearsal. It is here, now! And when you see the clear, bright, highly defined pictures of modern day television as received on one of Farnsworth's table or console models, you know that today's television is outstanding.

For two decades Farnsworth has pioneered in advancing television from a promise to a fact. The technical accomplishments of Farnsworth engineers—from the original development of the electronic television system to practical television as we know it today—have made history.

Superb modern designs characterize Farnsworth's current line of television receivers that, in addition to television sight and sound reception, include standard radio and/or frequency modulation. Some models also combine the deluxe Farnsworth record changer for complete television, radio and phonograph service in one instrument.

These instruments offer the same superior performance that has become synonymous with the Farnsworth name in every branch of its electronics activity. Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

PHONOGRAPH-RADIO

Now! Farnsworth brings
top-quality music and
radio entertainment to
modern passenger trains!

NOW! Progressive railroads can offer the traveling public the same high quality of music and entertainment enjoyed in their passengers' own homes. With this new service, railroads can pave the way to greatly increased passenger train luxury and revenue.

In offering the first practical electronic program distribution system, Farnsworth has met the three basic requirements which railroad-conducted studies have shown necessary to high quality rail-borne entertainment: (1) uniform, low-level sound distribution; (2) automatic compensation for varying ambient noise levels; (3) programs that passengers want to hear.

In the de luxe Farnsworth systems four channels are available for individual selection: popular or luncheon music; semi-classical or dinner music; radio programs; train announcements and travel talks. Also available are more simplified single- or dual-channel systems.

All Farnsworth systems are simple to install; operate automatically and unattended. Unitized construction permits instantaneous replacement of units without manual disconnection of a single wire. Other noteworthy features are: push-button precision crystal radio tuning and self-rewinding wire reproducing mechanisms.

Farnsworth Passenger Program Distribution Systems have been engineered by the same laboratories that gave the world its finest instrument for musical reproduction -- The Capehart.

FARNSWORTH STABILITY EXTENDS THROUGH FARNSWORTH DISTRIBUTION

When the order-taking days are over, the dealer with the Farnsworth franchise will be spared many of the headaches common to high-pressure marketing.

One reason is the stability of the Farnsworth distributor. Chosen for his merchandising experience and his reputation for fair dealing, the Farnsworth distributor carries into his work of distributing the Farnsworth line the same singleness of purpose that Farnsworth puts into its manufacture.

Another reason is Farnsworth quality. Backed up by eighteen years of engineering research and manufacturing experience in the field of electronics, the

Farnsworth "streamlined" line of radios and phonograph-radios is winning more satisfied customers every day for Farnsworth dealers.

Too, the Farnsworth Selected Dealer Policy brings to every Farnsworth dealer the assurance of profit—remember, there are only one-fourth as many Farnsworth dealers in your market area as there are dealers representing other lines. Hence, four times the sales potential.

Truly, the Farnsworth dealer is going places! Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana.

TODOS LOS CUADROS que se graban
 en el corazón tienen por colores
 los de nuestros sentimientos.
 Una cara que se nos aleja. . . .
 Una esperanza que se desvanece. . . .
 Una palabra que corta como un sable. . . .
 ¡Si oscuro es el colorido,
 oscuros son nuestros momentos

EL FARNSWORTH

Uno de los nuevos modelos de exportación Farnsworth de construcción tropical. Cinco bandas—Radiodifusión, banda de radiodifusión tropical y todas las bandas importantes de onda corta hasta la de 13 metros inclusivos. También banda espaciada. Típico de la calidad Farnsworth en radios y radiofonógrafos.

Espíritus y formas misteriosas se entremezclan a través de la "Symphonie Fantastique" de Berlioz, en el cuadro pintado para la Colección Capehart por Julio de Diego.

y mil formas fantásticas
 parecen no querer abandonarnos,
 como cuando el joven Berlioz
 pintó con música maravillosa
 su propia confusión. . . .!
 ¡Pero en los más tempestuosos
 instantes de la vida, la música es sosiego
 . . . porque . . . entre las sombras, es luz
 en medio de la tormenta, es bonanza!

EL CAPEHART

La gloria plena de la sinfonía o de la música coral está siempre a la disposición de quienes poseen un Capehart. Este radiofonógrafo, dotado de un nuevo sistema tonal revolucionario, reproduce la música tan magistralmente que sólo puede compararse con la voz o los instrumentos originales.

FARNSWORTH *Television · Radio · Phonograph-Radio*

Farnsworth Television & Radio Corporation, Fort Wayne 1, Indiana, E.U.A. Dirección Cablegráfica: "Television" • Receptores Farnsworth para Radio y Televisión • Válvulas Farnsworth para Televisión • Sistemas Móviles de Comunicaciones y Control del Tráfico de Ferrocarriles y Carreteras • El Radiofonógrafo Farnsworth • El Capehart • El "Panamuse" por Capehart

QUE dourado vínculo une os povos em harmonia? Não é a política, nem os sistemas, nem mesmo navios carregados de tesouros. A humanidade é uma só em seus anelos, em seu amor pela música.

O selvagem Khan, da mesma maneira que uma inocente criança, se comove ao ritmo de uma dança, ante os arpejos de

° FARNSWORTH

A sua fabricação especial para os trópicos caracteriza este novo modelo Farnsworth para exportação. Cinco faixas para rádio-recepções comuns e tropicais e todos os importantes alcances de ondas curtas, incluindo-se o de 13 metros. Conta, também, com faixa ampliada. Típica qualidade Farnsworth em rádios e rádios-fonógrafos.

Danças festivas das tribos nômades polovtsianas. Uma interpretação de Robert Riggs, para a Coleção Capehart, das Danças Polovtsianas do "Príncipe Igor", de Borodín.

um violino ou é arrebatado pelos penetrantes sons de uma trompa. O grito de um clarim chama, de modo igual, ao servo e ao senhor. Isto porque a música fala todos os idiomas — é o apêto de mãos universal, o livro constante, sempre aberto. Deixe que a inspiração da boa música lhe fale, agora, por meio do Capehart e do Farnsworth.

° CAPEHART

Mediante um novo sistema revolucionário de tonalidade, o Capehart leva a música ao seu lar como jamais lora levada. Toda a clareza do próprio instrumento musical e da voz humana é reproduzida com surpreendente exatidão. Peritos em móveis de estilos desenham os gabinetes do Capehart.

¿QUÉ LAZOS de oro
aúnan el sentimiento de
las naciones? No la
política, no los sistemas
ni los buques con sus
bodegas repletas de tesoros.
Los pueblos se unifican
en su afición a la música.
El khan salvaje, no menos

II FARNSWORTH

Este nuevo modelo Farnsworth para la exportación se caracteriza por construcción tropical. Cinco bandas—emisión regular, emisión tropical y todas las escalas importantes de ondas cortas hasta la de 13 metros. Ensamble de bandas, también. Todo esto es típico de la calidad Farnsworth.

Danza festiva de los miembros de la tribu nómada Polovtsiana. Una interpretación para la Colección Capehart de Danzas Polovtsianas de Borodín, del "Príncipe Igor", ejecutada por Roberto Riggs.

que el niño inocente,
se alegra al sonido de una
danza o al toque de una
corneta. Deje que la
inspiración de la música
clásica le conmueva
ahora por medio del
Capehart y el Farnsworth.

III CAPEHART

Gracias a un revolucionario
nuevo sistema tonal, el Cape-
hart reproduce la música con
una fidelidad sin precedente. Toda la claridad
de los instrumentos originales se reproduce con
una exactitud sorprendente. Muebles de estilos
clásicos proyectados por artistas en el ramo.
